### Class in the Clouds

The Class in the Clouds programme continues to draw almost 28 000 learners per annum. 80% of the participants in the Class in the Clouds programme are from previously disadvantaged communities. A number of schools have made this programme part of their annual educational excursion.

The teacher assistants employed by TMACC to assist school groups are from the Chrysalis Academy. The Academy provides development opportunities for youth on the Cape Flats, and aims to transform 'youth at risk' into strong, positive community leaders.
